| Name | Date | In Time | Out Time | Work Hour | Over Time |
|-------|------------|----------|----------|-----------|-----------|
| Admin | 2022-05-30 | 06:01:33 | 06:02:08 | 00:00:35 | 00:00:00 |
| Staff | 2021-12-20 | 08:00:00 | 17:00:00 | 08:00:00 | 00:00:00 |

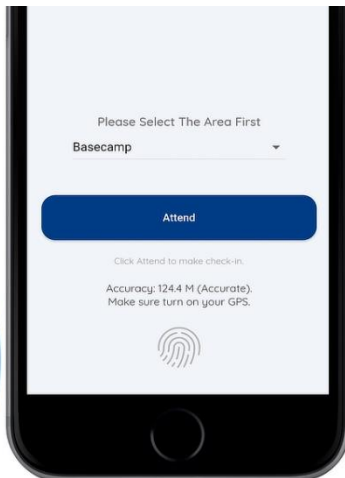

Showing 1 to 2 of 2 entries

-Display report info in detail

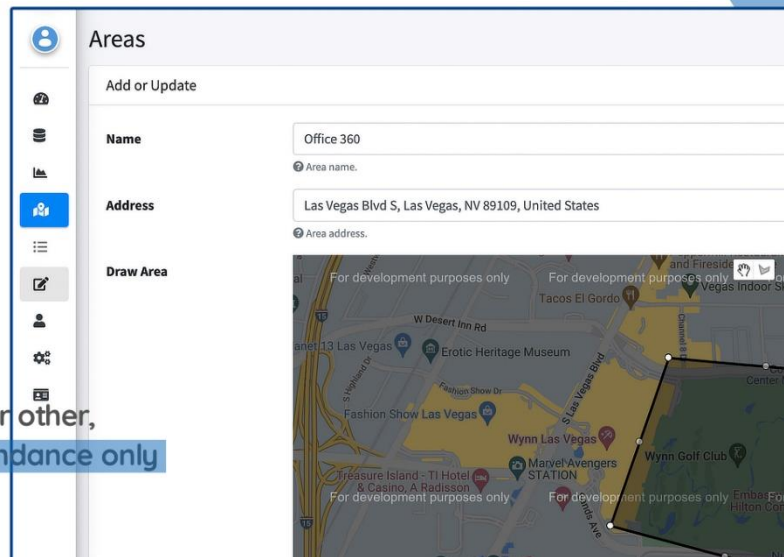

-Export your data as CSV, PDF, Excel or Print it.

-Filter data by date.

Easy Attend

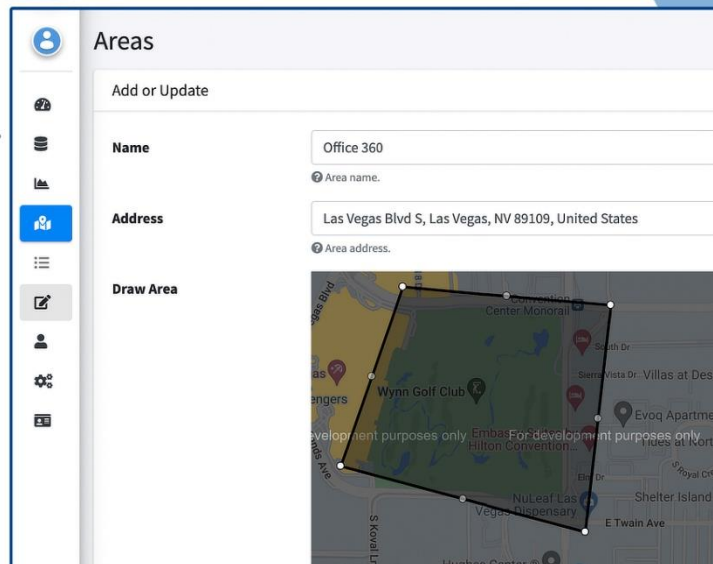

Drawing Office area, university, or other, and the user can only make attendance only the user's location is in the area that has been drawn.

Equipped with anti-fake GPS, so users can't make a fake presence

Support multiple areas, you have several offices? the system can handle several areas.

==== About this system?

This is an application for employee attendance. Track your employees online and save your employee's data to your database (MYSQL). **You can create an area such as an office or university, where users can only be absent in that area. This prevents absent users outside the office or university area.** This application works with a

system called Attendance with Fingerprint (Android App). Attendance login system based on Laravel. Your employee/user will attend with the fingerprint on the device.

Note:

This system can only work with Android or IOS devices that have a fingerprint.

===== Technology

We use Laravel and Flutter.

===== Demo

System Management:

Url: <https://attendancefingerprint.muliatech.web.id>

App:

-

Download: https://drive.google.com/file/d/1ME_dPxxiP9twwEQ5A9oDwZjISb9B5BOz/view?usp=sharing

-Do settings

-Find the QR from the management system, Home -> Setting

Auth Login:

1. Administrator

Pass: 123456789

User: administrator@gmail.com

2. Admin

Pass: 123456789

User: admin@gmail.com

3. Staff

Pass: 123456789

User: staff@gmail.com

Note:

the demo database will reset every morning.

===== What did you get in the package?

- System Management (Laravel)
- App (Flutter)
- Documentation
- Apk file
- SQL file

===== This application is suitable for?

- Universities, attendance of students
- The company, for employee attendance
- Or else, to check attendance

***Note:**

Remember, this application uses GPS coordinates to check whether the user is in the office. So, it might take time to get the user's current location, waiting for time-based on the location such as buildings, or other things that cause your device to be difficult to find the user's current location.
